Trademark Research Report

Glossary

A

Abandoned (Status)

The application has been abandoned for one of several reasons, including:

- applicant's failure to respond within six months
- applicant's failure to submit the required information or documents
- applicant's voluntary withdrawal
- the result of a successful challenge (Opposition) by a third party.

Allowed (Status)

The mark has been approved for registration and has passed the Opposition period. The USPTO is awaiting the submission of a Statement of Use by the owner.

Applicant

The party that filed the application to register the mark.

Assignments

Documents that have been filed with the USPTO and that affect title to the mark. While most involve the assignment of all rights, title, and interest in the mark, entries also record mergers, security interests and other transactions.

C

Cancelled (Status)

The registration has been cancelled by the USPTO for one of several reasons, the most common of which is the Registrant's failure to file a Section 8 Affidavit of Use between the 5th and 6th anniversaries of the Registration Date.

Certification Mark

A mark used to designate that the goods or services associated with the mark have met certain specified criteria, such as those of quality, origin, or method of manufacture.

Collective Mark

A trademark or service mark used by an organization to distinguish the goods or services of the organization's members from non-member goods or services.

Collective Membership Mark

A mark used to designate membership in an organized group.

Commerce Use

The date the mark was first used in commerce that Congress can regulate (e.g., commerce across state, territorial, or international lines).

Correspondent

The party designated to receive correspondence from the USPTO regarding the application, registration, or TTAB proceeding.

D

Description

Identifies the various components of a mark that has a design feature. Descriptive statements are most often present when the presentation of the mark could be subject to multiple interpretations.

Design Codes

If the mark includes a design element, the USPTO will assign one or more six-digit codes to describe the design. Based on codes developed by the World Intellectual Property Organization (WIPO), each entry also includes an equivalent literal description of the specific design feature.

Disclaimer

The portion(s) of a mark that are disclaimed by the owner as not subject to its exclusive use. This normally includes matter that is considered descriptive of the goods or services.

E

Expired

The registration has expired, normally because the owner failed to renew it in a timely manner or the USPTO has refused renewal.

F

Filed (Date)

The date that the USPTO received a complete application that contained all required materials and assigned a Serial No. to the application.

Filing Basis

Indicates the statutory basis that the owner of the mark has relied on for filing the application. Applications may be based on:

- a good faith intent to use the mark on the stated goods/services
- actual use of the mark in commerce (see Commerce Use)
- ownership of a non-US (International) registration or priority application for the mark

First Use (Date)

The date the mark was first used anywhere on or in association with the goods or services.

G

Goods & Services

A description of the goods and/or services on or in connection with which the mark is used.

I

Int'l Class

The International Classification schedule which contains 45 classes of goods and services. This schedule is the primary classification system used by the USPTO since 1973. The USPTO assigns one or more classes to the application depending on the goods or services identified in it.
